For new models, the print version of the Workshop Repair Manual is published after the vehicle launch date.

On the other hand, with DIALOGYS, a version of the Workshop Repair Manual is available on the launch date.

This approach allows the Workshop Repair Manual to be revised in DIALOGYS before it is printed, thereby limiting revisions in the form of Technical Note.

"The repair methods given by the manufacturer in this document are based on the technical specifications current when it was prepared.

The methods may be modified as a result of changes introduced by the manufacturer in the production of the various component units and accessories from which his vehicles are constructed".
